

THE CHALLENGES & BENEFITS OF MOVING TO THE CLOUD

Cloud migrations are complex. Netweb thoroughly evaluates your current IT landscape and builds a comprehensive roadmap for your cloud journey.

THE ERA OF CLOUD ADOPTION

80% | IT Organizations running some workload on the cloud today

83% | Enterprise workloads expected to be in the cloud by 20202

75% | IT organizations expected to run multiple clouds by 20203

TOP 5 REASONS KEEPING ORGANISATIONS FROM MOVING TO CLOUD

Vendor Lock in

Security Concerns

Storage Location

Lacking skills

Integration Issues

WHY SHOULD YOU MOVE TO THE CLOUD ?

Scalability with workloads

Add cloud capabilities at your own pace. Respond quickly to changing business requirements with the ability to add capacity during peak seasons and reduce it when you need less

Secure Infrastructure given by provider

Built-in security features encrypt and protect your data. Always get up-to-date security updates and protect applications and data from threats and ransomware. Security health monitored across your entire environment.

It's Cost Effective

Pay less and get more! Run any part of your business in the cloud on your terms and timeline. Pay only for what you use, when you need it. Pay a predictable rate for always-on critical services

CLOUD MIGRATION TIPS TO ENSURE A SMOOTH TRANSITION

NETWEB'S CLOUD MIGRATION SOLUTIONS

Whether you are moving your existing application to the cloud or need to build a new cloud-native platform, we're here to help. We migrate and manage business-critical workloads on multi cloud computing platforms, helping you in every step of cloud development life cycle i.e. assessing the infrastructure, designing a cloud data migration roadmap to its maintenance.
